Advantages

- Easy handling
- Total time saving of up to 520 h/year
- Large filling volume of 53 ft³
- No precrushing necessary
- Time saving during collecting the cardboard: 110 to 220 h/year
- Time saving due to the automatic filling of the press chamber: 150 to 300 h/year

- No staff needed
- The press can also be loaded by hand on front side
- Higher safety standard thanks to the automatic filling
- Higher market revenues thanks to direct marketable bales
- Staff is immediately available again

Process

Easy handling

Staff is immediately available again.

Automatic emptying

The button of the collecting cart is lifted and the rotors catch the material.

Automatic filling

The rotor conveys the material evenly spread into the press chamber.

Higher market revenues

Bale weight of up to 1102 lbs, bale density up to 470 kg/m³. 30 lb/ft³

Time saving per year 260 to 520 hours

Less personnel expenditure for the disposal.

Guiding system TopPlus®

Solid construction, long life-time, low maintenance hydraulic.
